

Tips and Tricks using Dokuwiki

Exporting your lab notes

- You can get a pdf copy of your digital notebook by putting this link on a dokuwiki page:
- replace “wiki:documentation:nicolina” with the namespace you want to export. You see the current namespace in the address bar of your browser. eg. this page is in the namespace wiki:dokuwiki:tips
- Save the page and click on the resulting link. It will take some minutes and then a pdf of your lab book should be downloaded.
- Unfortunately the order of pages is not by date
